The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply											
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status

#### **DETAILED ACTION**

### Drawings

Figure 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 81, 82, 91, 92, 95, 95b, 96, 96b. Correction is required.

The drawings are objected to because reference number 71, figure 1a, item 14, is missing a leader line. Further, each figure must have a unique figure number. 37 CFR 1.85(u)(1) Correction is required.

## Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "comprising" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The disclosure is objected to because of the following informalities:

Brief descriptions of figures 1a, 1b, 2a and 2b are missing.

Appropriate correction is required.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over US patent 6145888, Ohmi et al in view of US patent 6039319, Coonce et al. In figure 1 below.

Ohmi et al discloses a fluid

coupling comprising first and second coupling members (1, 2) having respective gasket holding annular ridges (7, 8) on butting end faces thereof, and an annular gasket (30) interposed between the two coupling members, the fluid coupling being characterized in that at least has a fluid channel (AA) comprising an opening passageway (CC) orthogonal to the butting end face thereof, and a slanting main passageway (BB) communicating therewith, the opening passageway having a diameter equal to the inside diameter of the annular ridge. Ohmi et al does not disclose the gasket having an

Art Unit: 3629

inside diameter smaller than the diameter of the opening passageway. Coonce et al teaches a gasket (38) having an inside diameter smaller than the diameter of the opening passageway (D1, D2) "to reduce fluid entrapment" (column 4, lines 66-67). It would have been obvious to one having ordinary skill in the art at the time the invention was made to fabricate the gasket with an inside diameter smaller than the diameter of the opening passageway to reduce fluid entrapment, as taught by Coonce et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron M Dunwoody whose telephone number is (703) 306-3436. The examiner can normally be reached on Monday - Friday between 7:30 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynne H Browne can be reached on (703) 308-1159. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-7687 for regular communications and (703) 305-7687 for After Final communications.
